MINI PROJECT

TITLE: NOTES KEEPER APP

AIM:

To develop a mini project as Notes Keeper App by using Android Studio .

1. INTRODUCTION:

The **Notes Keeper App** is a simple Flutter-based application developed to help users create, store, manage, and access personal notes along with attached files. The application provides a user-friendly interface where users can easily add notes with titles, descriptions, and upload files such as images, PDFs, or documents.

This project demonstrates the use of Flutter for cross-platform UI development and basic file handling using the file picker system.

2. OBJECTIVE:

The main objective of this project is to:

- Create a simple note-taking application
- Allow users to store notes with attached files
- Provide easy edit and delete options
- Display notes in a clean and attractive UI
- Improve productivity through digital note management

3. SCOPE OF THE PROJECT:

This application can be used by:

- Students for storing study materials
- Professionals for managing quick notes
- Anyone who wants to save small information with attachments

The app works on Flutter Web (and can be extended to mobile platforms).

4. HARDWARE REQUIREMENTS:

- RAM: 4GB or above
- Processor: Intel i3 or higher
- Storage: Minimum 1GB free space
- Operating System: Windows / Linux / MacOS

5. SOFTWARE REQUIREMENTS:

- Flutter SDK
- Dart Programming Language
- VS Code / Android Studio
- File Picker Package

- Web Browser (for running Flutter Web)

6. TECHNOLOGIES USED:

- ☐ Flutter (Frontend Framework)
- ☐ Dart (Programming Language)
- ☐ HTML (for file handling in web)
- ☐ File Picker (for uploading files)
- ☐ Material Design UI components

7. SYSTEM DESIGN:

7.1 Modules

1. Add Note Module

- Allows user to enter title and content
- Upload file attachment

2. View Note Module

- Displays all saved notes in list format

3. Edit Note Module

- Allows modification of existing notes

4. Delete Note Module

- Removes unwanted notes

5. File Handling Module

- Opens uploaded files in browser

8. **WORKING PROCESS:**

- User opens the Notes Keeper App
- Clicks the “+” button to add a new note
- Enters title and content
- Selects a file using file picker
- Saves the note
- Notes are displayed in the home screen
- User can edit, delete, or open file anytime

9. **FEATURES:**

- Simple and user-friendly UI
- Add notes with title and content
- File attachment support
- Edit and delete notes
- Open uploaded files
- Responsive design
- Attractive gradient UI

10. **ADVANTAGES:**

- Easy to use
- Lightweight application
- Fast performance

- No internet required (for basic usage)
- Helps in organizing notes efficiently

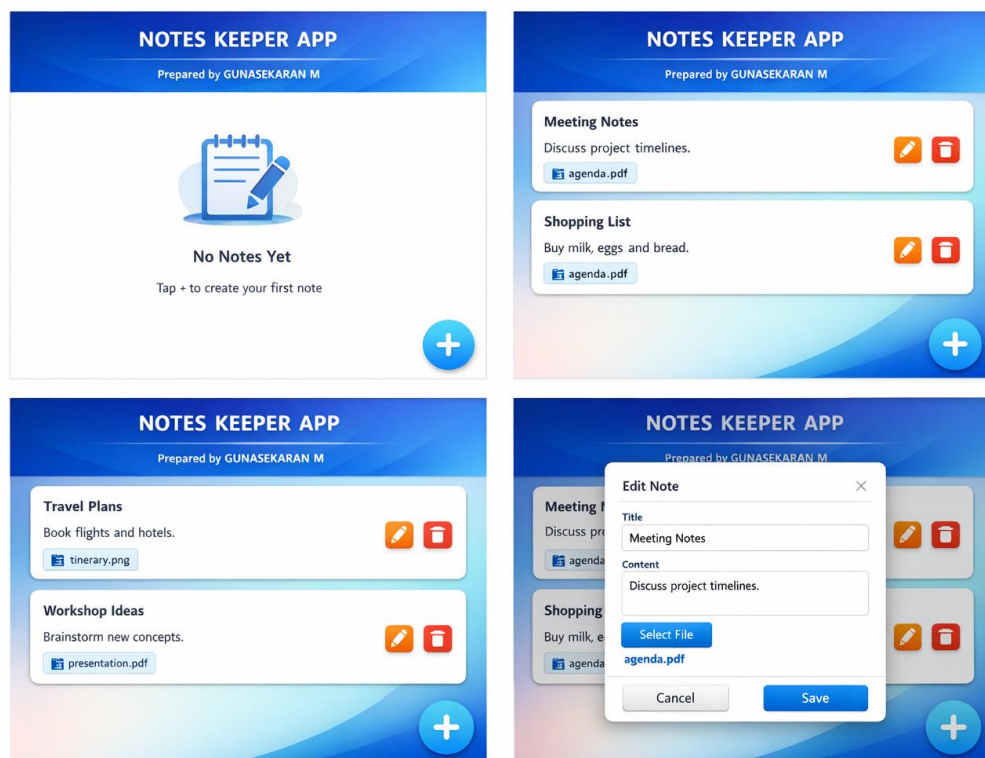

11.**FUTURE ENHANCEMENTS:**

- Cloud storage integration (Firebase)
- User login system
- Search functionality
- Dark mode support
- Note categorization
- Reminder system

12.**CONCLUSION:**

The Notes Keeper App successfully demonstrates a simple yet effective note management system using Flutter. It helps users store and manage notes with file attachments in an organized manner. This project improves understanding of Flutter UI development, state management, and file handling concepts.

13. INTERFACE/OUTPUT:

RESULT:

Thus , to develop a Notes Keeper App was successfully developed and executed using Android Studio.
